AI Action Summit 2025: Shaping the Future of Artificial Intelligence

Context : The **AI Action Summit 2025** will take place on **February 10-11, 2025**, at the Grand Palais in Paris, France. Hosted by French President **Emmanuel Macron**, this event will bring together world leaders, experts, and organizations to discuss how Artificial Intelligence (AI) can be managed, improved, and used responsibly.

Prime Minister **Narendra Modi** will attend the summit as a **co-chair**, highlighting India's growing importance in the global AI field.

Why This Summit Matters

The AI Action Summit focuses on key global issues related to AI, such as:

- Finding ways to encourage **innovation** without causing harm.
- Ensuring that AI systems are **safe**, **trustworthy**, and **ethical**.
- Bringing countries together to create rules and guidelines for AI.

Important Past Events Leading to the Summit

1. **2023 AI Safety Summit (Bletchley Park, UK)**

   - The summit discussed concerns about AI going out of control.
   - Led to the **Bletchley Declaration**, signed by 28 countries, including the US and China.
   - The declaration emphasized:
     - Making sure AI systems work in line with human goals.
     - Protecting **human rights** and maintaining **ethics**.
     - Holding developers accountable for reducing risks.

2. **2024 AI Seoul Summit (South Korea)**

   - Co-hosted by South Korea and the UK in May 2024.
   - Key outcomes:

- Established basic rules to ensure AI safety.
- Agreed on ways to manage both the **opportunities** and **risks** of AI.

Key Details of the Paris AI Summit

Event Schedule

- **February 10**: **Multistakeholder Forum**

  - Brings together governments, businesses, civil society, researchers, artists, and journalists.
  - Activities include **presentations, discussions, and roundtable meetings** on AI solutions.

- **February 11**: **Summit of World Leaders**

  - Heads of State will meet to plan ways to manage AI globally and ensure cooperation.

Main Themes of the Summit

1. **AI for Public Good**

   - Exploring how AI can improve **healthcare**, **education**, and solve social problems like climate change.

2. **AI and Jobs**

   - Discussing how AI will change jobs, create new opportunities, and the need to train people with new skills.

3. **AI and Innovation**

   - Highlighting how AI can boost creativity, innovation, and cultural development.

4. **Trust in AI**

   - Focusing on making AI systems **transparent**, **accountable**, and fair to earn public trust.

5. **Global AI Governance**

   - Discussing the need for countries to work together to set global rules for AI use and development.

Challenges and Global Developments

Europe's AI Challenges

- Europe struggles to match the AI advancements made by the **US** and **China**.
- Strict European rules are often seen as slowing down tech growth.

US AI Leadership

- The US launched the **Stargate Project**, a $500 billion plan involving companies like Microsoft, Nvidia, and OpenAI, to strengthen its AI technology.

China's AI Progress

- Despite challenges, Chinese companies like **DeepSeek** and **Alibaba** are creating AI models that can compete with those from the US.

Different Ways Countries Manage AI

1. **European Union**: Strict rules based on how AI is used and its risks.
2. **United Kingdom**: Flexible rules that encourage innovation.
3. **United States**: Balances rules with encouraging new ideas but is leaning toward fewer restrictions.
4. **China**: Focuses on strong government control of AI for safety and state needs.
5. **India**: Promotes **safe**, **ethical**, and **trustworthy** AI while addressing misuse, such as the spread of harmful information.

India's Role in AI

- India hosted the **Global AI Summit** in New Delhi in July 2024.

- Key points from India's leadership:

    - Promoted **ethical AI practices**.
    - Showcased AI's potential to boost **inclusive growth** and development.

- Prime Minister Modi's attendance at the Paris summit reinforces India's commitment to using AI for progress and shaping global discussions on its responsible use.

Conclusion

The **AI Action Summit 2025** will be a key event in deciding how AI should be developed and used worldwide. It will focus on making AI systems safe, trustworthy, and beneficial for everyone.

With **Prime Minister Modi's leadership**, India is playing an important role in ensuring AI is used to solve problems and improve lives globally while maintaining ethical standards and fostering

innovation.
